PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building scalable ASP.NET Core Web APIs, optimizing SQL performance, and supporting production systems. MongoDB Associate Developer certified with hands-on exposure to AWS services including RDS, Aurora, S3, API Gateway, and SQS. Proven ability to deliver reliable, high-performance backend solutions. Adept at leading end-to-end backend development cycles, from data flow management to deployment in production environments.

CORE SKILLS

- C#, ASP.NET Core Web API
- MongoDB (Certified Associate)
- API Gateway, Aurora & RDS, S3
- Microsoft SQL Server, PostgreSQL
- AWS EC2, Lambda, CloudWatch, Glue, SQS
- GitHub, Jira, Excel

PROFESSIONAL EXPERIENCE

Backend Developer

Autovyn Consultancy Pvt. Ltd., Jaipur, India | September 2023 – Present

Developed and maintained robust backend systems ensuring database efficiency and reliability. Optimized complex SQL queries, improving performance by 40%. Reduced API response times through efficient integration strategies. Skilled in working with both SQL and NoSQL databases, including Microsoft SQL Server, PostgreSQL, MySQL, and MongoDB. MongoDB Certified – Associate Developer. Administered and optimized MS SQL Server and PostgreSQL databases using Dapper for data access. Led full project lifecycle from data sourcing to deployment, managing branching, merging, and CI/CD pipelines.

PROJECTS

Maruti CRM Insurance Portal – msibplcrm.co.in

Designed a CRM platform to manage insurance workflows, enhance customer relationship management, and improve operational efficiency.

Service Marketing Reminder – dealercrm.co.in

Implemented an automated reminder system to boost customer engagement and ensure timely service follow-ups.

AutoVYN Connect

Contributed to backend development for an attendance and leave management system using .NET, enabling secure login/logout, leave tracking, and real-time HR reporting.

CERTIFICATIONS

- MongoDB Certified Associate Developer
- AWS Community Day - Participation Certificate

EDUCATION

Master of Computer Applications

Vivekananda Global University, Jaipur

KEY ACHIEVEMENTS

- Reduced API response time by up to 40%
- Improved SQL performance and system stability through optimization
- Delivered production-ready APIs with thorough testing and documentation
- Successfully led full backend deployment cycle, including branch management, pipeline validation, and production release
- Streamlined and secured database workflows, ensuring accurate and efficient data transfer between environments
- Acted as the primary point of control for data flow, system monitoring, and backend reliability
